

flo™ 1750

mobile workstations

Connect with patients – and to patient information – in the same place, with Flo, the fully integrated wireless mobile workstation. Spend more time with patients. Deliver better care. Improve data accuracy and patient safety. From the bedside, across the hospital, and back again, the Flo 1750 keeps you connected to clinical applications and data.

flo™ 1750 mobile workstations

More than ever, clinicians, IT staff, and hospital administrators are under pressure to deliver high quality care, to integrate new technology into an already complex hospital environment, and to comply with multiplying regulations. All this, while continuing efforts to increase efficiency without compromising the highest standards in patient safety. With these demands in mind, Flo Healthcare has designed the Flo 1750 to make users' lives a little easier.

Just what clinicians want

The Flo 1750 brings the clinician closer to the patient. Its sleek, lightweight design enables clinicians to do more where it matters most – at the point of care. Access to real-time patient information allows the clinician to interact more with patients, and significantly reduces the opportunity for error. No solution is easier to use or better designed from the clinician's perspective.

Made with IT in mind

IT departments like the Flo 1750 because it is a single-sourced, integrated solution, is reliable, comes with standard components, and is supported by a team of technical professionals trained to work with IT and clinical staff. The Flo 1750 also comes fully assembled – simply roll it out of the box, charge the battery, and put it to work.

Delivering to the administrators' needs

The Flo 1750 provides hospitals with a value-based, premium solution administrators can believe in. Backed by a 100 percent satisfaction guarantee, the Flo mobile clinical workstation is an effective tool to improve hospital processes, with a total cost of ownership that makes sense.

Fully integrated and ready to roll

Ergonomic design

Multiple configurations

Wireless connectivity

Ergonomic design is synonymous with ease-of-use

Flo 1750 is designed to provide healthcare practitioners with the convenience of a true nurses' workstation, without becoming heavy or cumbersome. With its small footprint, the Flo 1750 is designed for mobility – allowing easy access even in cramped quarters. On the other hand, a large work surface provides ample room for charting and convenient access to a full-size keyboard. The Flo 1750 also features a full-size monitor for better viewing, with height and tilt adjustments to reduce eyestrain and back fatigue. And – unlike many workstations – all of the Flo 1750's wires and cables are enclosed within the body of the cart, reducing the dangers of snagging or catching while on the move.

Flexible for how you work

Flo Healthcare understands that flexibility is key when purchasing mobile workstations – not all clinicians, hospitals, or even floors have the same requirements. So the Flo 1750 offers a variety of options from wire baskets to locking drawers – allowing each facility to create its ideal configuration. And through partnerships with selected innovative, quality-focused companies, Flo Healthcare offers a wide range of peripherals that can be fully integrated into the Flo 1750. These include handheld units, barcode scanners, vitals technology, and a Lifespan Healthcare rail system.

An integrated solution with appeal

The Flo 1750 is a fully integrated, turnkey solution that includes mobile cart, hardware, display, and wireless components, in multiple unit configurations. The Flo workstations arrive fully assembled – simply roll out of the box, charge the battery, and start using. Made from structural materials that are durable, light-weight and strong, the Flo 1750 can handle knocks and scrapes from other equipment and is easily cleaned using hospital grade disinfectants. The clean, sleek profile is designed to go anywhere and enhance the hospital's professional image.

Technology you can rely on

Recognizing that integrating technology into a healthcare environment can be daunting, Flo Healthcare based the Flo 1750 on proven technology that works the first time and is flexible enough to change and upgrade as needed. Our mobile workstations are built using components of your choice from leading technology providers such as Dell, HP, IBM/Lenovo, Panasonic and Wyse. The Flo 1750 offers a variety of battery solutions (size, chemistry and monitoring), decreasing downtime and providing greater reliability than other providers. And Flo workstations are UL-60601-01 (formerly UL-2601-01) certified, ensuring compliance with biomedical standards.

The Flo 1750 works with all standard wireless networks. Where a network has yet to be installed, the Flo 7.4 Wireless Access Point System is an ideal choice for enterprise-class wireless network performance, guaranteed. Flo 7.4 supports more wireless configurations, and provides the widest coverage area for wireless networking.

The conveniently located footrest is comfortable when charting and entering patient data - just one of many well-designed ergonomic features.

The Flo 1750 features many storage options - including drawers, wire baskets and bins - which can be quickly and easily interchanged.

The adjustable keyboard and large work surface allow the Flo 1750 to be used for many different activities, in either a standing or sitting position.

flo™ 1750

mobile workstations

Beyond a commitment to service

The Flo Healthcare customer service promise begins when a hospital starts evaluation of the Flo 1750. Our service team not only helps determine the facility's operational needs, but also offers a variety of post-installation service and maintenance options. Flo Healthcare provides access to technical professionals trained to work with both clinicians and IT staff to solve problems and reduce downtime. And of course, the Flo 1750 comes with a 100 percent satisfaction guarantee.

Innovation that sets the standard

Flo Healthcare's combination of healthcare expertise and innovative design has set the standard for mobile clinical workstations, making the Flo 1750 the workstation everyone wants to copy. In fact, Flo Healthcare holds patents on virtually all aspects of the Flo 1750 – from the adjustable monitor to the large work surface.

flo™ 1750 Technical Specifications

Base Cart

Footprint	17" x 17"
Construction	Aluminum base, column, and work surface with steel support structure
Work surface	21" x 16" Height adjustable from 32" to 42"
Casters	Four swivel: two locking, two non-locking; low rolling resistance on all surfaces
Storage	User configurable; available with several storage and accessory options

On-board Computer

Select PCs or Thin Client devices from Dell, HP, IBM/Lenovo, Panasonic, Wyse, and many others, featuring Microsoft Windows, Intel Core Duo Processor, and Cisco CCX compatible Wireless LAN connectivity.

Display

Diagonal size	19" Standard
Display type	LCD
Option	Touch screen available

Power Supply

Battery	Nickel Metal Hydride (NiMH)	Sealed Lead Acid (SLA)
Input Voltage	100-240 VAC @ 5 amps	100-240 VAC @ 3 amps
Output Voltage	10.5 – 16 VDC	10.5 – 16 VDC
Battery run time	Up to 14 hours*	Up to 8 hours*
Charging Time, Full Charge	3–4 Hours	4–6 hours
Charging Status Indicator	LEDs with continuous readout and with BatteryPro Software	LEDs with continuous readout
Power	500Wh	312Wh

* Actual run time may vary depending on several factors such as technology configuration, battery age, usage pattern and power supply model/battery option. Run time is based on continuous use for a system using 35 Watts. Patent #6,493,220 and #6,721,178

5801 Goshen Springs Road NW, Suite A
Norcross, Georgia 30071
