

EMR and Clinical Documentation

Healthcare providers recognize that electronic medical records (EMRs) are a major force behind hospital technology adoption because they improve care and reduce costs, while improving efficiency. When integrated with high-performance mobile workstations from Flo Healthcare, EMRs and clinical documentation move the collection of patient data to where it matters most – the point of care. This real-time charting provides clinicians with access to current information, which results in better, more informed clinical decisions.

Benefits of mobile documentation on Flo mobile workstations

For Clinicians it...

- Improves productivity reducing overtime
- Improves job satisfaction
- Facilitates access to clinical decision support

For Hospitals/Facilities it...

- Reduces transcription costs
- Streamlines expense coding
- Improves asset utilization

For Patients it...

- Reduces data entry errors
- Improves security of patient information
- Improves clinical outcomes

Designed with mobility in mind, Flo mobile workstations feature a small footprint, large monitor, full-size keyboard and wireless antenna, all while offering high uptime and consistent performance for a full shift.

Use the ergonomic tilting keyboard to quickly and comfortably enter patient information.

Tilt, swivel or rotate monitor to easily view EMR documentation.

Key Accessories

Monitors/Screens: Monitor
Privacy screen
Touch screen overlay

Storage: Drawers
Baskets
Chart holders
Glove boxes

Rail Systems: Lifespan Healthcare rail system

Scanners: Bar code scanner
Bar code scanner cup
Bar code scanner mount

*Flo mobile workstations are compatible with all leading CIS vendors.
