

# Flo Dashboard

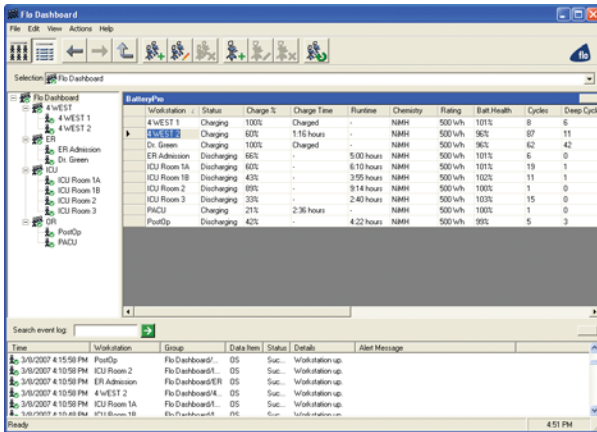

Cart management made easy

Flo Dashboard makes cart management easy. Whether you are managing a fleet of 2 carts or 200, its straightforward graphical interface makes managing your mobile workstations a breeze. Flo Dashboard's user configurable display allows you to choose how you display data on charge level, remaining run-time and battery health. What's more, Flo Dashboard's flexible directory hierarchy allows you to organize data about your fleet in numerous ways, and to set alerts at all levels: from a single cart to the entire fleet. Flo Dashboard increases productivity, reduces downtime and keeps carts where they belong – at the bedside.

# Flo Dashboard

Cart management made easy

## Features

- Based in Industry Standard SNMP
- Intuitive directory hierarchy
- View as a group or as a table
- Information about the power supply system (Status, Charge Level, Charge Time, Remaining Run-time, Battery information, Battery Health)
- Information about the work station (Operating System, IP address, SNMP ID, Memory, CPU)
- Searchable history log
- Alerts and notification on screen or via email

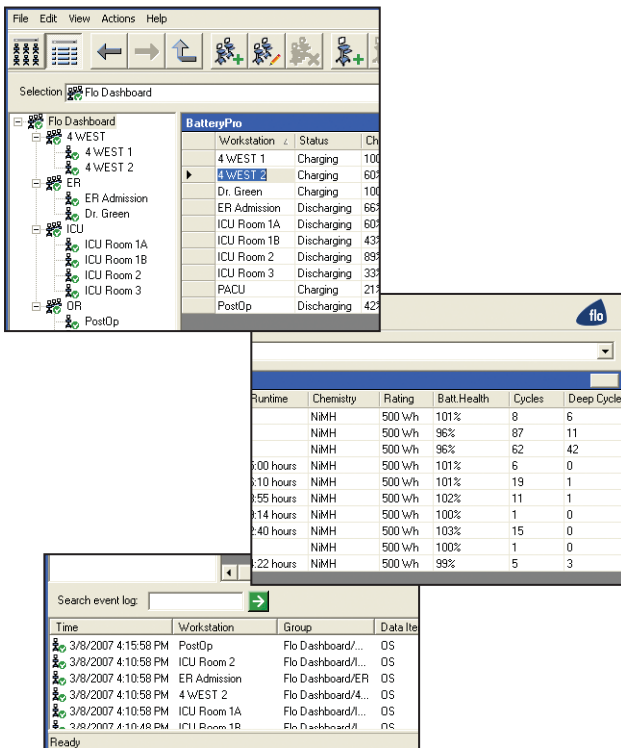

## Alerts

Alert conditions can be set for numerous parameters and Flo Dashboard notifies the user on screen (change icon, change field color) or via email.

Alert Condition	Operator	Value
Charge %	<	5

E-mail Alert Recipients when Alert condition is met? Alert Message: Charge Level less than 5 %

Flo Dashboard provides real-time status on an entire fleet of carts using icons for a quick overview:

## System Requirements

- PC with Pentium III 1 GHz or higher processor
- Microsoft Windows XP or Windows 2000, running SNMP Service
- Microsoft .NET Framework 1.1
- 512 MB of RAM
- 512 MB of hard disk space
- TCP/IP network protocol
- CD/DVD-ROM drive
- BatteryPro enabled power supply and BatteryPro client running on the workstation
