

MOBILE EMS UNIT

Easily transport your Command Center to emergency scenes and operate with little to no preparation!

A MOBILE SOLUTION USING EVENT MANAGER

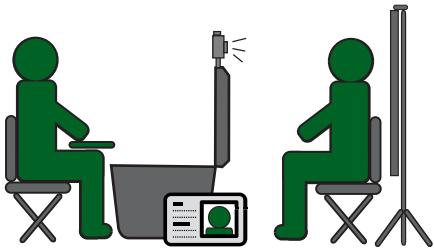

The **Mobile EMS Unit** is a turn-key solution packaged as a compact, self-contained workstation that includes everything First Responders need to manage an incident at an emergency scene. The **Mobile EMS Unit** is designed to quickly be transported to an emergency scene and setup with little to no preparation.

Just lift the lid, power up and you're ready to go!

This workstation is a complete solution used to track personnel and assets, issue credentials and manage information onsite at an emergency scene. The durable, waterproof casing can house a command workstation, badging system, cable management, mobile tracking devices and badging supplies and protects the equipment from atmospheric hazards.
