

Combining the most popular elements of the LaserBand® products, the LB2-ADULT-L3 wristband features the most intuitive assembly and design to date. The wristband lies extremely flat on a patient's wrist for superior comfort and ease in scanning.

IDEAL FOR ORGANIZATIONS NEEDING

- Streamlined patient intake process with a combined wristband/label form for simultaneous printing
- Patient data protected by self-sealing laminated wristband
- Expandable wristband to fit a range of adult patient sizes, including bariatric and edema patients
- Wristband that indicates tampering
- Straightforward assembly and usability that simplifies workflow

FEATURES

- Easy wristband fastening method streamlines workflow
- Comfortably fits adult patients
- Labels included on form streamline the patient ID print process and free up printer drawers for other documents
- Patented self-laminating seal is water and alcohol resistant, preserving patient data for longer wristband usability
- Adhesive-free zones around form edges and holes prevent printer jamming and reduce costly maintenance
- Ultra-white image area optimizes scanner performance
- Wristband extender included to help fit a wide range of patient sizes and conditions (bariatric, edema, etc.)
- Hole-punched to fit securely in healthcare charts
- Integrated tamper evident wristband tabs indicate tampering
- Variety of color options for special ID needs, including condition alerts (e.g., allergy, DNR, fall risk, etc.)
